

THE SAFETY PASS

YOUR ONLINE SAFETY AWARENESS ORIENTATION

The Safety Pass provides an online orientation of the 13 most common hazards and prepares you to deal with them. It's convenient, easy-to-use, easy-to-understand, interactive and accessible.

The platform will deliver and track your safety training across the system, entered by you, your training providers and in-house instructors. Records are always accessible.

The Safety Pass is completely free! It is also fully transferable site to site. If you're a mobile worker, you don't need to re-take the program when starting a new job. Your certification remains valid for 3 years.

Site-specific orientations, WHMIS and Working at Heights (WAH) certificates continue to be required. The Safety Pass allows the focus to be on project site-specific orientation.

Contractors are using The Safety Pass as a requirement for all on-site workers. It provides a consistent level of Health and Safety Awareness, leading to an overall improvement of safe work practices on all construction projects.
